# EXILIS ELITE...

## TRANSFORMING APPEARANCES

### WHAT YOUR COLLEAGUES ARE SAYING...

“In its first few months Exilis has become the most utilized aesthetic device in my practice. We never realized how many patients were seeking more affordable treatments for wrinkles, facial tightening and rejuvenation until we offered Exilis. What is unique about Exilis is that we can now comfortably shape and then tighten in the same treatment zone for most body areas; upper arms, love handles, knees, etc.”

—Dr. Robert Weiss,  
Associate Professor of Dermatology, Johns Hopkins University

“Exilis has been one of the most positive additions to my practice in terms of patient satisfaction, clinical results, and revenue generation.”

—Dr. Kiya Movassaghi,  
Plastic Surgeon, Eugene, OR

“I tried two other machines, Zerona and Zeltiq, and was disappointed... However, after just two weeks with the Exilis being used on my love handles I saw a noticeable difference and was thrilled. The technology is superior to the other devices on the market for fat melting and tissue tightening.”

—Dr. Jeanine Downie,  
Dermatologist, Montclair, NJ

“Exilis may become a standard for many cosmetic practices. Today’s patients want measurable results fast with painless and affordable treatments. Exilis allows us to offer this and more.”

—Dr. Mark Salzman,  
Plastic Surgeon, Louisville, KY

“Exilis has quickly become our most popular office procedure! Many of my patients have an area on their face, neck or body that can benefit from the tightening and contouring of this radio frequency device. It is painless, with no downtime and my patients love the results. My Exilis system was paid off within the first four months of ownership.”

—Dr. Rhonda Rand,  
Dermatologist, Beverly Hills, CA
